SPRING SUMMER 26

SPRING SUMMER 26

**WELCOME THE SUNSHINE WITH OUR SPRING
SUMMER COLLECTION – A BREATH OF FRESH
AIR FOR YOUR WARDROBE.**

Inspired by the lightness of the season, our latest collection brings together breezy silhouettes, playful prints, and joyful colour palettes designed to uplift and inspire. Whether you're dressing for slow mornings, spontaneous getaways, or golden-hour gatherings, each piece is crafted to move with you—effortlessly and beautifully.

This season, discover soft organic cottons, flowing linen viscose blends, and airy woven textures that feel as good as they look. From relaxed layering pieces to elegant summer dresses, we've embraced the spirit of the season with comfort, colour, and conscious design at the heart of it all.

We're also introducing sun-drenched hues, hand-drawn prints, and lightweight knits that carry you from day to night with ease. And as always, our commitment to sustainability continues, with GOTS-certified fabrics and mindful production practices woven into every piece.

Here's to a season of sunshine, simplicity, and style.

With love,
The Nomads Team x

OUR VALUES

EVER SINCE NOMADS EMBARKED ON ITS JOURNEY IN 1989, WE'VE WORKED CLOSELY WITH OUR SUPPLIERS AND **NURTURED VALUABLE, LONG-TERM BUSINESS PARTNERSHIPS IN INDIA** AND HAVE CAREFULLY DEVELOPED A SUPPLY CHAIN OF LIKE-MINDED PEOPLE WHO SHARE OUR ETHOS.

Rooted in slow fashion and classic designs, we strive to source our fabrics as responsibly and as natural as possible. More recently we have added knitwear from China to widen our offering in recycled yarns in winter and in linen and cotton for summer.

We ask all of our suppliers to sign our Code of Conduct and expect complete transparency throughout the production process. All except the very smallest of our producers have a SEDEX or BSCI certification, which means they go beyond the levels of ethical conduct required by law. Some of them are also GOTS certified, as are we. We personally know where our products are made and have a good relationship with each factory.

Our India based production manager, Manojj, visits our Indian suppliers regularly throughout the year, even when our team in the UK can't get there, to ensure that our standards are being met.

Our commitment to responsible fashion means you feel better about what you wear.

OUR FABRICS

ORGANIC COTTON
Organic is our preferred choice when it comes to cotton as it is grown without the use of harmful elements – kindest to PLANET, PRODUCERS & PEOPLE who wear it. We are proud to be GOTS certified – it is the GOLD standard when it comes to the sustainable processing of textiles worldwide.

LINEN BLENDS
This season, as well as the return of our bestselling Linen and Viscose fabric we have also introduced a Linen Cotton yarn for our knitted tops. These are the perfect blends of extraordinary fibres. This summer you will find classic summer pieces from trousers and jumpsuits to jackets, dresses and tops in multiple colours, both plains and prints in this luxurious mix of 25% Linen and 75% Responsible Viscose. Both are made using European Linen, which is grown organically.

COTTON
From cotton poplin to cotton slub, cotton drill and Chambray, this fibre is so versatile and creates such a variety of fabrics. Natural, breathable and biodegradable. Poplin is a lovely crisp cotton fabric in our exclusive prints, perfect for the summer months. Whilst Drill is a heavier cotton fabric with a twill weave, similar in structure to denim, so perfect for trousers and jackets on a cooler day. Our ever popular Chambray returns with its denim-like look but that has less impact on the environment than Denim.

LENZING ECOVERO
Lenzing EcoVero™ fibres make beautiful jersey and woven fabrics that have a soft drape. EcoVero™ is made using sustainable wood pulp from certified and controlled wood sources and is produced to high ecological standards and has been awarded the EU Ecolabel for environmental excellence.

LENZING TENCEL™ MODAL
Naturally hypoallergenic fibres are extracted from sustainably grown wood pulp from FSC-certified forests and produced using a unique closed-loop system which recovers and reuses the solvents used, minimising the environmental impact of production.
